

Digital Differentiation Resources

Prizmo Go

- Free app for ipad or iphone
- Takes photo of text and “reads” to the student
- Paid version also translates
- Can change the voice/accent and speed of reading (my students prefer “Nicky” ;)

Just Read - Chrome Extension

- Go to Chrome Web Store, search for Just Read, add to Chrome
- Wipes away all advertisements and clutter from websites
- Helpful for students with ADHD or attention issues
- Great way to also use with Read Aloud
- [Video demonstration of Just Read and Read Aloud](#)

Read Aloud - Chrome Extension

- Go to Chrome Web Store, search for Read Aloud, add to Chrome
- Select any text and it will read it back to students
- Helpful when editing their work - make sure it says what you “think” it says AND did you select the correct word when using spell check

Voice to Text - Integrate into Google Docs

Flipgrid - Reading Running Record

- Useful to have evidence of reading
- Pre Corona - we conferenced together in the “feedback” section
- Post Corona - I can still hear them read (= invaluable). I can leave “feedback” but not as timely/impactful

Book Creator - Digital Notebook

- We DO NOT use the app but go through www.app.bookcreator.com . This way I can see all of their books “live” and they are working in my library
- Used it to help them reflect on their learning and thinking, to develop spelling, vocabulary, multiple students working on different targeted interventions
- Post-Corona - I had to let it go. I didn’t want to have students have to deal with another platform.
